# STUDENT VOICES

"Working on curriculum development was a very beneficial experience for me...In the future I see myself going into education and this experience gave me a new perspective on teaching...Working with Wedu has not only given me a global perspective I would not have achieved elsewhere but it also gave me a new kind of hope for the future." - *Joi D., UCSB EAP Thailand, Wedu Leadership Development Internship*

"I have learned a lot about software engineering, especially web design and front-end development. This is something that I would not learn at school. This internship helped me apply the knowledge that I learned from my classes in real life. Another big impact this internship had on me is that I really learned to associate technology with business. Therefore, I improved a lot on justifying my engineering work as something applicable in the business world." - *Rain W., UCSB EAP Singapore, Variantz Internship*

# FREEMAN FOUNDATION

Having resided in China for many years, the Freeman family is an advocate for increased awareness of East Asia, and through the foundation, it generously supports programs that promote greater knowledge and understanding of that region of the world among Americans.
